Electric Line at Clemson

In the near future Clemson College will be operating her own electric line, according to the Greenville News. The matter has been under consideration by the trustees for some time. In fact when the new boilers and dynamos were installed last summer they were made amply powerful to supply all local demand on them at the College and also to run the electric line from Calhoun to the college. The road will be laid with 90 pound rails and so ballasted as to bear the heaviest trains. Coal, of which the college uses a great deal, has now to be hauled in wagons at great expense and loss of time. So with all other freight. This fall they expect to handle all freight to the college in the original cars drawn by their own motors.

It is the intention of the college to finally extend the line to connect with Cherry's station on the Blue Ridge railroad.

The early completion of the road will mean much in freight hauls to say nothing of the convenience to visitors and others having business at Clemson.

Thousands Have Kidney Trouble and Never Suspect it.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a brick dust sediment, or settling, stringy or milky appearance often indicates an unhealthy condition of the kidneys; too frequent desire to pass it or pain in the back are also symptoms that tell you the kidneys and bladder are out of order and need attention.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills almost every wish in correcting rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. Corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and immediate effect of Swamp-Root is soon realized. It stands the highest because of its remarkable health restoring properties. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes.

You may have a sample bottle sent free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. Mention this paper and remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

"The Blood is The Life."

Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which suffers through disease. The brain is also clouded, the mind and judgement are affected, and many an evil deed or impure thought may be directly traced to the impurity of the blood. Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It cures and purifies the blood, thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by inclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

You can't afford to accept any medicine of unknown composition as a substitute for "Golden Medical Discovery," which is a medicine of known composition, having a complete list of ingredients in plain English on its bottle-wrapper, the same being attested as correct under oath. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

HARD LIFE OF BACHELOR SEAL.

Has Nothing Like So Good a Time as Human Counterpart.

"This skin," said the furrier, "came from a young seal bachelor, a youth ignorant of love and of life."
 "How do you know?" the lady asked.
 "By its fineness, its perfection," he replied. "The pile, you will note, is like closecut velvet. Only bachelor seal skins have such a pile."
 "The bachelor seal," he went on, "has a rather sad life. The big bull seals in the seal islands have each a household of 15 or 20 wives, but the young bachelors must herd by themselves. Let one of them attempt to marry, and straightway a bull seals him. Not till he is big enough to fight and conquer a bull—not till he is 14 or 15 years old—can he know the delight of settling down in a home of his own."
 "He is not like the human bachelor, the favorite of the chorus girls, the reveler in all sorts of club luxuries; but he leads a hard, ascetic, celibate life, only in the end, as like as not, to make a lady a very fine coat. All the very fine coats, I repeat, are made from the unhappy bachelor seals."

Why Snow is White.

The reason that snow is white is that all the elementary colors are blended together in the radiance that is thrown off from the surface of the crystals, which may be examined in such a way as to detect these colors before they are mingled together to give the eye the impression of whiteness.

The whiteness of the snow is also in some degree referable to the quantity of air which is left among the frozen particles. Considerably more than a thousand distinct forms of snow crystals have been enumerated. These minute crystals and prisms reflect all the compound rays of which white light consists.—Chicago Tribune.

Sartorial Wisdom.

A Manhattan magazine announces upon the authority of the leading writer on men's fashions that "double-breasted trousers" will be the vogue next spring. The same authority is quoted as declaring that "it is now considered good form to line the buttonholes with silk straight to the edge." This oracle has a competitor who also periodically ventilates the ludicrous combined with the incongruous. In an article treating of the approved period of mourning, the rival of the "double-breasted trousers" dictator, prescribed weeds as follows: "Husband for widow—nine months."

RAISING CATS ON BIG SCALE

Mr. J. D. Whittle, of Barnwell county, has 450 acres of oats which is now beginning to head. This is perhaps the finest body of grain in South Carolina. The land is partly in the hands of the heirs of Blackville. With average seasons during the first half of May he will make 30,000 bushels and if he gets eighty cents per bushel, which is the price he got last year, it will be \$24,000. Mr. Whittle is a very progressive farmer. He generally puts from 1,500 to 2,000 pounds of commercial fertilizer to each acre. After oats are harvested he proposes to put 200 acres of this land in cotton, from which he hopes to get 200 bales, and the balance of this land he will plant to corn.—Anderson Intelligence.

70 Bales on 60 Acres

IS WHAT WADE DRAKE RAISED LAST YEAR.

Editor Daily Mail:
 Dear Sir—The following correspondence will explain itself. Kindly publish it in every month oblige us.
 Yours truly,
 Anderson Phos. & Oil Co.

Mr. J. Wade Drake, A. G. P. A., Atlanta, Ga.
 Dear Sir—We have heard that by a liberal use of fertilizer, principally in soil dressing, you made 70 bales of cotton on sixty acres of land last year. We will appreciate if you will give us your method of preparation, fertilization and cultivation which resulted in this crop. We wish to give the public the benefit of your experience as we think it will be an inducement to farmers to side dress their crops.

Thanking you in advance for the favor of an early reply, we are,
 Yours truly,
 Anderson Phos. & Oil Co., Anderson, S. C.

Gentlemen—Answering your favor of the 17th will say that after preparing the land with 100 two hundred pounds of fertilizer to the acre before planting. At the second plowing I applied four hundred and fifty pounds more of fertilizer to the acre and when the first cotton blooms appeared I applied seventy pounds of nitrate of soda to the acre. I did this on sixty acres of land which I planted in cotton and on the sixty acres I gathered sixty-eight eight bales of cotton, averaging 511 pounds to the bale. And then, when I thought I had gathered the crop after Christmas, I picked enough cotton to make 72 pounds of lint cotton so it will be seen that altogether I made more than seventy 500 pound bales of cotton on the sixty acres. I cultivated this cotton as I usually cultivate my cotton except that it was fertilized better than usual. A good part of this fertilizer was Anderson Phosphate and Oil company fertilizer. The balance was other standard brands. I was never able to see any difference in the cotton fertilized by Anderson goods and the other goods.
 Yours truly,
 J. Wade Drake.
